## DETAILED ACTION

*Claims 1-11 are pending.*

### ***Restriction Requirement***

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
  - I. Claims 1-3 and 11, drawn to a method of treatment or prophylaxis of an inflammatory disease wherein stressor is oxidative conditions, classified in Class 424, subclasses 93.7 and 577.
  - II. Claims 1-3 and 11, drawn to a method of treatment or prophylaxis of an inflammatory disease wherein stressor is ultraviolet radiation, classified in Class 424, subclasses 93.7 and 577.
  - III. Claims 1-10, drawn to a method of treatment or prophylaxis of an inflammatory disease wherein stressor is both oxidative conditions and ultraviolet radiation, classified in Class 424, subclasses 93.7 and 577.
2. Groups I- III are different methods. These inventions are different with respect to ingredients, method steps, and endpoints which require non-coextensive searches ; therefore, each method is patentably distinct.
3. These inventions are distinct for the reasons given above. In addition, they have acquired a separate status in the art as shown by different classification and/or recognized divergent subject matter. Further, even though in some cases the classification is shared, a different field of search would be required based upon the structurally distinct products recited and the various methods of use comprising distinct method steps. Moreover, a prior art search also requires a literature search. It is an undue burden for the examiner to search more than one invention. Therefore restriction for examination purposes as indicated is proper.

A telephone call was made to Lorna L. Tanner on 10/03/03 to request an oral election to the above restriction requirement, but did not result in an election being made.
